

LAKSHIT YADUVANSHI

Computer Science Undergraduate | MERN Stack Developer

Jaipur, Rajasthan | 8505036054 | lakshityaduvanshi.dev@gmail.com | linkedin.com/in/lakshit-yaduvanshi-0234a1317 | github.com/lakshityaduvanshi-dev | leetcode.com/u/BFhD4keqRC

PROFESSIONAL SUMMARY

Results-driven Computer Science undergraduate (CGPA: 9.4/10) and MERN Stack Developer with hands-on experience building scalable React.js frontends and optimizing Node.js/Express.js backends. Internal Smart India Hackathon (SIH) 2025 winner with exposure to full-stack architecture, database management (MongoDB, SQL), and cloud/AI deployment using IBM Watsonx. Elite-certified in DSA and Java by NPTEL, IIT Kharagpur. Seeking a Software Developer / Web Developer role.

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Python

Frontend Development: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, Bootstrap

Backend Development: Node.js, Express.js, REST APIs

Databases: MongoDB, SQL

Core CS Concepts: Data Structures & Algorithms (Java), OOP

Tools & Platforms: Git, GitHub, VS Code, Google Colab, IBM Cloud (Watsonx)

Core Competencies: Teamwork, Problem-Solving, Time Management

INTERNSHIPS / EXPERIENCE

Experiential Learning Intern – Generative AI with IBM Cloud — *SmartBridge*

Jul 2025 – Aug 2025

- Integrated pre-trained IBM Watsonx APIs with Python scripting workflows to build text-automation solutions deployed on IBM Cloud infrastructure.
- Collaborated with mentors to design and test AI-driven automation pipelines, strengthening applied skills in cloud-based generative AI tools.

Web Development Trainee — *Anand International College of Engineering*

Aug 2024

- Engineered responsive, cross-browser-compatible user interfaces using semantic HTML5, modern CSS3 layouts, and vanilla JavaScript.
- Established core performance and optimization principles later applied to building React.js-based frontend applications.

PROJECTS

E-Com Hub — E-Commerce Web Application — *React.js, JavaScript, CSS3*

- Architected a custom React.js storefront with a modular component structure, emphasizing clean design patterns and efficient DOM rendering over generic templates.
- Implemented dynamic state management and React Hooks to enable real-time client-side search, product filtering, and instant cart updates, reducing rendering lag.

Smart Leftover Food Analyzer — AI-based Food Freshness Estimator — *Python, Machine Learning, VS Code, Google Colab (Team of 4)*

- Built an intelligent system to automate food freshness estimation using machine learning models.
- Managed dataset collection, preprocessing pipelines, and model training/configuration within Google Colab and VS Code.

EDUCATION

B.Tech, Computer Science & Engineering — *Anand International College of Engineering, Jaipur*

2023 – 2027

Current CGPA: 9.4/10 (Perfect 10.0 SGPA in Semester 5)

Class XII (RBSE) — *Saint Lawrence Public School*

2023

Percentage: 90.8%

Class X (RBSE) — *Saint Lawrence Public School*

2021

Percentage: 97%

CERTIFICATIONS

- Data Structures & Algorithms using Java (Elite) — NPTEL, IIT Kharagpur
- Programming in Java (Elite) — NPTEL, IIT Kharagpur
- Linux & BASH Shell Scripting — Spoken Tutorial, IIT Bombay (Score: 100% / 86.67%)
- Experiential Learning on IBM Cloud (Generative AI) — SmartBridge, 2025
- Web Development Practical Training — Anand International College of Engineering

ACHIEVEMENTS

- Secured a perfect 10.0 SGPA in the 5th Semester of B.Tech CSE while maintaining a consistent overall 9.4 CGPA.
- Won 1st Position in the college-level Coding Competition, debugging and solving complex algorithmic challenges under strict time constraints.
- Won the Internal Hackathon at Anand-ICE for Smart India Hackathon (SIH), collaborating in a team to build solutions for real-world problem statements.
- Solved 250+ Data Structures & Algorithms problems on LeetCode, strengthening problem-solving and coding-interview readiness.
- Earned Elite certifications from IIT Kharagpur in DSA (Java) and Programming in Java, ranking among the top tier nationally.
